# Autumn

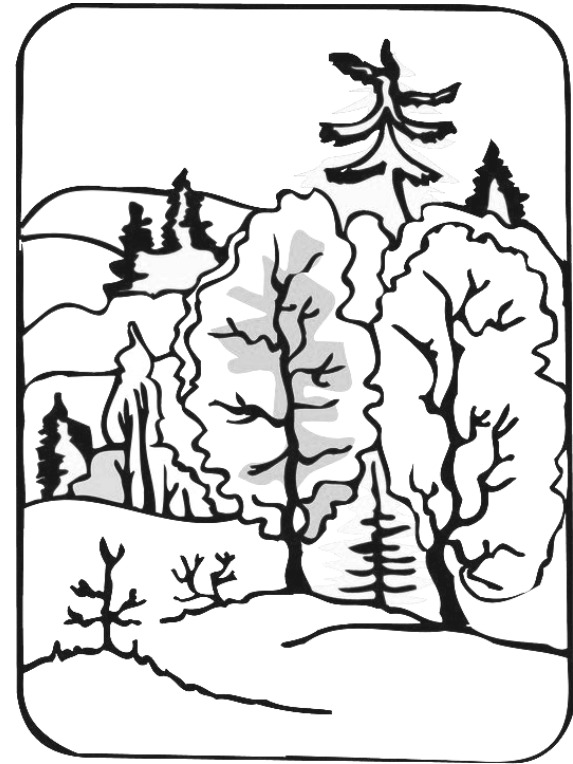

It is autumn! In the autumn the days get colder. Summer is ending and it is time to get ready for winter.

In the autumn children go back to school. It is too cold to go to the beach. Now it is time to read!

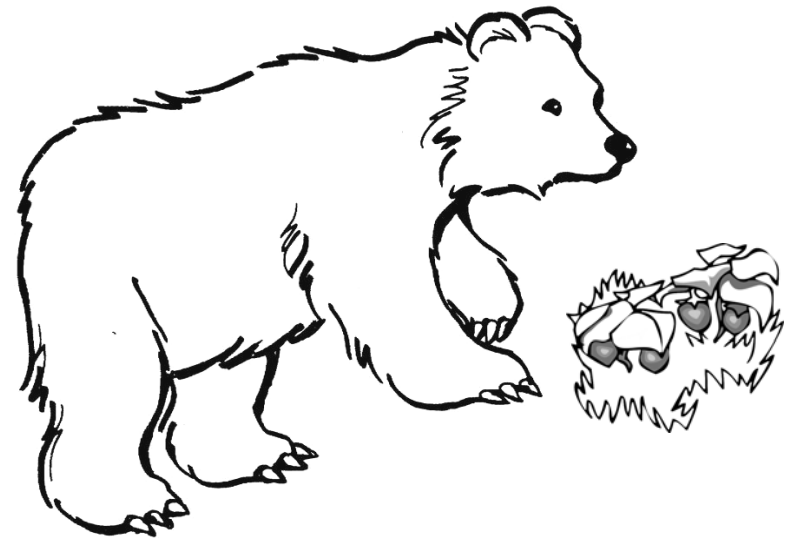

In the autumn we rake up leaves off the grass after they fall from the trees. It is fun to make a big pile to jump in!

In the autumn the leaves turn colours. They go from green to yellow and red and brown. Then the leaves fall from the trees.

In the autumn food is ready to harvest. Farmers pick apples and pumpkins and corn.

In the autumn animals get ready to hibernate for the winter. They have a long winter sleep. To get ready, they need to eat lots of food!
