Spring in My  
Yard

It is spring! It is getting warmer and the snow is melting away in my yard. Some days the sun comes out and some days it rains.

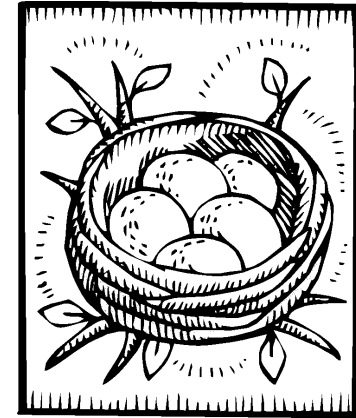

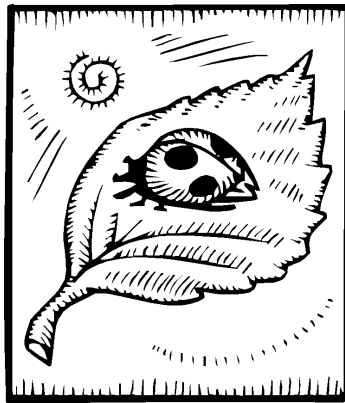

In the spring I like to go out and play in the puddles.  
Spring is a happy time of year.  
My yard is fun in the spring!

The trees bloom with little buds and pretty flowers are in the garden. I like to pick some for my Mom.

Little plants grow out of the ground in my Mom's garden. They grow and grow in the warm sun. They like spring rain, too!

Bugs like the warm sun and the new plants.

In the spring I go out in my yard and look for caterpillars and bugs.

Baby birds hatch from eggs and look for food! They keep their mom and dad busy getting dinner. I hear the baby birds when I eat my dinner!
