Lewisia cotyledon	

PLANTS SOURCES

There are a lot of garden centres and mail order nurseries now offering rock and alpine garden material.

Holes Greenhouses
101 Bellerose Drive
St. Alberta, AB T8N 8N8
1-780-419-6800

Excellent sources for alpiners and rock garden plants. Holes have a superb show garden highlighting many alpiners and rockery plants. A good selection of plants is illustrated in their Spring Gardening Reference Magazine that will assist in plant selection. Holes also offer mail order service.

Beaver Creek Greenhouses
Box 129
Fruitvale, BC V0G 1L0
www.rockgardenplants.com
email: bcreek@netidea.com

Excellent mail order service. Thousands of plant selections with descriptive catalogue.

Wrightman Alpines
RR#3 1503 Napperton Drive
Kerwood, ON N0M 2B0
www.wrightmanalpines.com
email: info@wrightmanalpines.com

Another excellent source of rare and unusual plants.

MORE INFORMATION

Books

There are countless books available on alpine gardening. One that I would recommend is "The Prairie Rock Garden" by Donna Balzer. This recent introduction provides relevant and comprehensive information on planning and construction of a prairie alpine garden. It also provides a good list of plants suited for the prairies.

Societies

Calgary Rock and Alpine Garden Society

Contact: www.craggs.com

This society, known as CRAGS, is a chapter of the North American Rock Garden Society. Meetings are held in Calgary once a month. The society offers a plant sale twice a year and is an excellent place to find good plants at bargain prices.
