

## equipment thermal imager

<http://www.mikroshot.com/>

This is a thermal imager camera, about the size of a regular digital camera. This is an American product and sell's for \$5,595.00 in USD.

- Compact & lightweight
- Low cost
- User friendly design
- High accuracy  $\pm 0.2\%$  of reading
- Focus-free from 1.3m (1.4 yards) to infinity
- Built-in visible camera

Mikron Infrared introduces its newest thermal imager offering with the MikroShot™. This small, easy to use thermal imaging camera will provide you with the data that you need to make the important decisions for your customers and clients. We live in a fast paced world, so a portable device that will give you the quality data that you need fast will put you at a competitive advantage. Instead of weighing yourself down with heavy, expensive equipment, you can get similar results with a device that fits in the palm of your hand! Battery operated power will put you on the scene faster with the convenience of data that you can easily download onto your laptop. Fast, small and low cost, the MikroShot will give you the quality results that you need.

## experiments pendulum

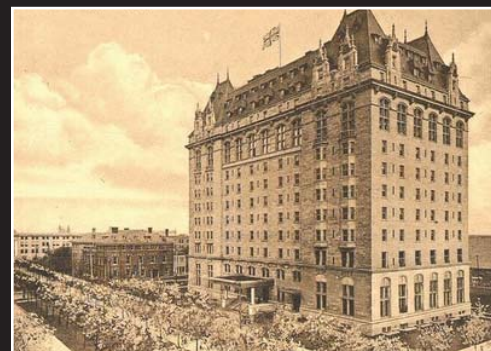

There purpose of this experiment is to see if the pendulum moves without the-aid of hand or a air movement. What you need is : 2 liter bottle, tooth pick, thread & a pendulum. Now you can also do this with Irish wind chimes too. Cut off the top of the bottle and a wee hole on the bottom. Thread the pendulum chain from the top to the wee hole. Anchor the chain so that it does not fall. Set the length of the chain, so that the pendulum will not rub on the surface when it is inverted. Set up a camcorder and ask question.

## fort garry hotel

by Maureen K. Fleury

[http://ghosts-hauntings.suite101.com/article.cfm/haunted\\_fort\\_garry\\_hotel](http://ghosts-hauntings.suite101.com/article.cfm/haunted_fort_garry_hotel)

Grand Trunk Pacific Railway built the Fort Garry Hotel in 1913 as luxury accommodation for its train passengers. The name came from Upper Fort Garry, which was next door to the hotel. Like the Canadian Pacific Hotels built across Canada, the Fort Garry Hotel was built in the chateau style of architecture with steep roofs, turrets and lavish ornamentation.

*The Fort Garry Hotel in 1913.*

### History of the Fort Garry Hotel

The architects, Ross and MacFarlane of Montreal, used the Chateau Laurier in Ottawa as the model for Fort Garry. This 12-story hotel has 340 guest rooms, each with a private bathroom. On the main floor of the hotel, there was the Musician's Gallery, which was situated between the Main Dining Room and the Palm Room. It was placed at a distance from both rooms in order to provide background music for guests.

The Crystal Ballroom and the Concert Hall were on the seventh floor joined by a gallery. In the 1990s, these halls were turned into a casino but in the early 2000s, the hotel removed the casino and restored these rooms back to their original purpose of dining, music and dancing.

In the early days, the Fort Garry Hotel was self-sufficient. It had a bakery, butcher shop, heating plant, artesian well and printing press. In addition, the chambermaids lived in the hotel on the top floor.

Famous guests over the years included Liberace, Sir Lawrence Olivier, Harry Belafonte, Louis Armstrong, Arthur Fiedler, Lester Pearson and Gordie Howe. In 1939, King George VI and Queen Elizabeth stayed at the Fort Garry Hotel during their tour of Canada.

Today, Hotel Fort Garry is still the symbol of opulence with marble floors, paneled ceilings, bronze railings and crystal chandeliers. The Palm room still has its original domed ceiling.

## PARANORMAL NEWS

### IPI representatives wanted

Take the next step up from being a normal member of the community and organisation. You can represent your area or country by voicing your concerns and opinions here to others sharing the same goal of working together to enhance the field. We want each Rep to have a huge say in this project and together make decisions on its direction and projects the exact way we all do when running our own groups. It has always been the intention to have the representatives running IPI and provide what is needed to our field. Some examples of what we may work on as Reps are:

- \* Creating New IPI Projects
- \* Creating articles on various subjects
- \* Continued Upgrade of IPI Resources
- \* International List of Locations
- \* Promotional Material and Ideas
- \* Voting on key issues
